

Buzzy, the smoke alarm and his friend, Flash,
an 8 volt battery, give a lesson in fire prevention.

Did you know that most fires occur
at night when people are sleeping?
A smoke alarm can tell you when
there's a fire in time to get out safely.
Be sure to install a smoke alarm on
each level of your home!

To be sure your smoke alarms
are always working, test and clean
them once a month. Also change the
batteries in your smoke alarms each
fall when you turn back your clocks.

Remember:
Smoke alarms save lives.
Don't stay home without one!
